

## UltraMicrofibre

Next Generation, MPC & Ultragleam Microfibre cloths, fabrics and mitts.

All Deeply Clean next generation Microfibre cleaning fabrics are designed in the UK and manufactured to our exacting standards using a combination of Polyester and Polyamide blends to suit the specific cleaning purpose of the product.

Our premium technical fabrics are manufactured from fibres that are split during the manufacturing process, the result is a product that has both excellent cleaning and high absorption properties. These tiny fibres collect and hold surface dirt and debris particles as well as retaining up to 8 X its bodyweight in fluid. DCM Microfibre leaves no lint.

In addition to the split spaces in the fibres created during the manufacturing process, DCM Microfibre fabrics clean mechanically because the fibres are positively charged. Dirt and dust particles are negatively charged so attract dirt to the body of the fabric which is then released during the laundering process or when rinsed out.

For best cleaning results, DCM Microfibre can be used dry or with a light mist of fluid on the target surface. For moisture removal our waffle and deep loop pile products are best suited on all hard surfaces.

Deeply Clean Marine offers a sustainable, high cleaning performance, ECO-friendly compliment to traditional cleaning regimes.

All DCM Microfibre products are designed to remove, collect, and absorb dirt debris and fluids as a part of a daily cleaning maintenance system.

DCM Products are designed in the UK and manufactured exclusively under strict regulation.

- Products designed exclusively for DCM
- Use dry or with water for an outstanding clean finish
- 30<sup>o</sup> wash cycles replacement guarantee.
- Washes at Eco Friendly 30°C
- Recyclable at end of life
- Antimicrobial quality available

## UltraMicrofibre Technical Specification

<b>Product Reference</b>	Ultragleam, MPC & NXG
<b>Performance</b>	Non-Abrasive, Ultra absorbent, Clean, debris removal & polishing
<b>Colour</b>	Non-Leaching colour as offered
<b>Weight</b>	150gsm - 1200gsm ± 5%
<b>Fibre</b>	Polyester/Polyamide 65/30 - 90/10
<b>Eco Credentials</b>	Cleans with water only, washes at 30 degrees & recyclable at EOL. No tumble required.
<b>Attributes</b>	Non abrasive Absorbent
<b>Applications</b>	As listed - Do Not Use on Hot Surfaces
